Education

Interaction Design (BA)- NCAD, Dublin

2020 - Present • Class Representative

At NCAD I obtained real-world project experience working with external organizations and leading design companies. Usability studies, user interviews, design sprints, building user flows, as well as other tasks enabled me to build competence with UX methods at an industry level.

Artificial Intelligence Applications (H.DiP)- CCT, Dublin

2022 - Present

In AI Applications at CCT, I examined current business trends in the utilization of AI, as well as the tools and technology involved in integrating AI in many business models, as well as various forms of accepted AI and its underlying implementation.

Project Examples

Trigger Remover - A safer way of using the web

April 2022 • <https://thomaskelly.design/trigger-remover.html>

Trigger Remover is a Chrome Extension designed to make using the web less stressful and trigger-inducing for users with mental disorders such as PTSD, anxiety, or eating disorders.

It achieves this through object recognition in images, as well as content content paraphrasing.

Intrusty - Getting feedback for students

January - February 2022 • <https://thomaskelly.design/intrusty.html>

Intrusty is a service used to connect students to lecturers and industry professionals so the students can get feedback on their work and projects. In exchange for participating in providing feedback on student work, lecturers and industry professionals gain LinkedIn skill endorsements.
