EXPERIENCE

Kingspan — *Product Designer (Commission)*

Over a three-week period, I was tasked with designing a product using 100% reusable plastic. I gained experience in conducting user interviews, creating design systems, 3d modelling and advertising for marketing purposes.

After completing the product, I received a design prize. The article is linked under the awards section.

Curry's — *Sales Representative*

At Currys, as Sales Representative, I gained experience with connecting customers to the technology which were best suited to their needs. Firm knowledge of technical specifications was needed for this role and I gained great insight into customer needs and expectations from the service I provided.

EDUCATION

National College of Art & Design, Dublin — BA *Interaction Design*

October 2020 - Present

Studying Interaction design I have had hands-on experience with design practices from User Experience methods to the Service Design process. I have completed projects designing for AI, creating interfaces for websites and apps, and conducted user interviews.

Google UX Professional Certificate, Google — *Certificate*

January 2021 - May 2021

From Google's UX Design Certificate programme, I gained experience in **User Experience frameworks**, software and marketing practices which are used at Google and its owned companies. I learned a substantial amount about accessibility and how users interact with digital products. With this knowledge, I can aid new users in getting more comfortable with products.
